Why is this a priority outcome?

What are the aims of our services that contribute directly to the outcome?

How will we achieve our service aims and the priority outcome?

Key performance measures

Why is this a priority outcome?

Cannock Chase continues to face a number of health inequalities which not only affect the quality of life and healthy years expectancy of its residents but also have a significant impact on the overall prosperity of the District and its communities, alongside the effects on employment, mobility, and access to services. The health of the District is closely interrelated with the economic environment, and it is widely recognised that “economic and social inequalities greatly influence the health of the population.”¹ The high levels of Incapacity Benefit claims in the District indicate the relationship between economic prosperity and health and wellbeing.

The District has an ageing population, with the over 65 population predicted to increase from 14,400 in 2008 to 23,700 in 2030; an increase of over 60%. An ageing population has the potential to significantly affect the use of health services, with older people being more likely to have greater demands of health services.

Life expectancy at birth in Cannock Chase District is significantly lower than the England average for both men (-20 months) and women (-19 months). However in some Wards Life Expectancy is even lower, thereby creating a larger inequality when compared to the England average.² Healthy life expectancy is also a problem in Cannock Chase, with males and females both expected to spend significantly more time in ill or poor health compared to Regional and National averages.

“All age all cause mortality rates” in Cannock Chase are the highest in Staffordshire. In some Wards the age-standardised rates of mortality are more than double the Staffordshire and England averages.

Circulatory diseases, cancer, and respiratory disease account for 72% of all deaths in the District. The age-standardised rate for “Premature mortality from Circulatory disease” in Cannock Chase is the highest in Staffordshire. Premature mortality from Cancer (and especially lung cancer) is also higher in the District (126) than the overall England (115) average.

Estimates of smoking prevalence indicate that, although numbers of smokers are decreasing, the percentage of people who smoke in Cannock Chase (25.9%) remains higher than County (20.4%) and National (22.2%) averages.

The issue of Obesity remains significant amongst children and adults in the District. The National Child Measurement Programme data indicates that whilst Obesity rates amongst reception year children are lower than County, Regional and National figures, by Year 6 Cannock Chase pupils are more likely to be obese.

	Reception	Year 6
Cannock Chase	9.4%	21.7%
Staffordshire	9.9%	18.6%
West Midlands	10.1%	19.8%
England	9.6%	18.3%

Table 1 Childhood Obesity. Source: Staffordshire JSNA Health and Social Profile of Staffordshire, December 2010.

The proportion of obese adults measured by estimates in Cannock Chase (29.4%) is significantly higher than the England average (24.2%) and above both County and South Staffs PCT averages (both 26.6%). Similarly, GP records in the District record 14.6% of patients as being Obese; higher than Staffordshire (10.7%) and England (9.9%) ratios.

The Health Survey for England 2008 found that the District also has a significantly lower rate of healthy eating adults (21.2%) than the England (28.7%) average. Research conducted by South Staffordshire PCT indicates that the most prevalent barriers to healthy eating include lack of time, cost, and inconvenience when compared to fast food.³

Evidence suggests that physical activity reduces the risk of cardiovascular disease and some cancers, helps to reduce obesity, and improves overall health and wellbeing. However, the Active People Survey in 2008/09 data indicates that 40.7% of adults aged 16 to 54 in Cannock Chase did no moderate activity, with the proportion rising to 69.2% for older adults aged over 55.

The Adult Lifestyle Survey⁴ commissioned by South Staffordshire PCT in 2008 also found that only 10% of respondents considered themselves very physically active; however, 63% of total respondents indicated that they would like to take more exercise, with the proportion rising amongst those considered obese (70.7%) or very obese (76.1%). The most popular forms of activity undertaken were short walks (52%), walks of 2+ miles (39%), and cycling (20%); with the most common facilities used being parks or walking routes, accounting for almost half of respondents (49.8%). The most common

⁴ *Ibid.*, pages 25-28.

barriers to taking more exercise were time availability (66.6%), motivation (29.3%) and cost (27.5%).

Priority Outcome: Active and Healthy Lifestyles

What are the aims of our services that directly contribute to the outcome?

Service Aims:

- Increase participation in physical activity
- Decrease in smoking prevalence and harm caused by alcohol
- Supporting vulnerable people to live in their own homes
- Regulate local food businesses to protect public health

How will we achieve our service aims?

Service Aim: Increase participation in physical activity

How	When				Who	Indicator	Resource
	Q1	Q2	Q3	Q4			
<p>Provide new modern leisure facilities that will lead to an increase in the participation of sport and physical activity. Modernise and remodel Chase Leisure Centre:</p> <ul style="list-style-type: none"> - commence construction project on site - completion and handover of fitness suite 	✓			✓	Culture and Leisure Services + Legal, Finance, HR, Audit, and Procurement	Achievement of start and handover dates.	£6.5 million approved in capital programme
<p>Deliver a full size Artificial Turf Pitch (ATP) at Cardinal Griffin RC High School (subject to planning consent and funding):</p> <ul style="list-style-type: none"> - planning consent - secure funding - start construction on site 	✓ ✓	✓			Culture and Leisure Services + Legal, Finance, Audit, and Procurement	Achievement of target dates for planning, funding, start and handover.	\$106 capital programme £345,000 (Council contribution).

How	When				Who	Indicator	Resource
	Q1	Q2	Q3	Q4			
- complete ATP and handover			✓				
Secure a partner for the management of the Council's Cultural and Leisure services by October 2011 in order to increase participation levels in physical activity and deliver £540,000 savings per annum from 1 st April 2012.			✓		Culture & Leisure Services + Legal, Finance, HR, Audit, Procurement	Savings of £540,000 per annum from 1 st April 2012.	Approved General Fund Revenue Budget 2010-11 Delivering Change. £150k

Service Aim: Decrease in smoking prevalence and harm caused by alcohol

How	When				Who	Indicator	Resource
	Q1	Q2	Q3	Q4			
Deliver Tobacco Control initiatives to local businesses in accordance with the Service Level Agreement with South Staffordshire PCT				✓	Head of Environmental Health	Delivery of brief intervention training covering tobacco and alcohol issues to at least 24 staff in order to deliver a programme of signposting and support to the general public.	Funding of £15,000 provided by South Staffordshire PCT in accordance with a service level agreement.
Implement the District Alcohol Harm Reduction Strategy action plan				✓	Head of Environmental Health		

Service Aim: Supporting vulnerable people to live in their own homes

How	When				Who	Indicator	Resource
	Q1	Q2	Q3	Q4			
Facilitate the adaptation of the homes of people with disabilities Target for number of adaptations completed: - 95 Council owned - 62 Privately owned				✓ ✓	Head of Environmental Health / Head of Housing	Number of completed adaptations.	£500,000 in HRA capital programme. £500,000 in General Fund Capital programme.

Service Aim: Regulate local food businesses to protect Public Health

How	When				Who	Indicator	Resource
	Q1	Q2	Q3	Q4			
<p>Protect the health of the public by regulating food businesses within the District to achieve compliance with legal requirements:</p> <ul style="list-style-type: none"> - achieve an annual increase in the number of premises broadly compliant with food safety requirements. - complete the required number of food inspections each quarter. - number of enforcement actions undertaken. 				✓	Head of Environmental Health	EH1	Existing resources within approved budget.
